Dear Meredith,

Attached please find the Notification of Timber Harvest Form and a Timber Harvest Map regarding a project Hull Forest Products, Inc. plans to conduct on approximately 12 of the 14.24 acres on property south of Route 82 in Montville. This operation is a selective with group selection timber harvest. The property boundaries have been identified in with pink ribbon and the trees to be harvested have been marked with blue paint marks at eye level and on the stump. This harvest will be conducted as a conventional cut to length operation where the marked trees will be felled and a forwarder and/or skidder will be used to transport the merchantable logs to a landing area that will be via temporary driveway on Route 82 where they will be hauled off site via log truck. The temporary, eventually permanent, driveway is being handled and built by the landowner prior to the harvest. The tops of the trees and residual branches will be slashed in place to within three feet of the forest floor. There are no wetland/drainage/stream crossings associated with this harvest but there will be trees removed in the upland review area. It is estimated 2 months of good working weather will be required to complete this project.

We understand the sensitivity of this site and all Best Management Practices regarding Timber Harvesting as adopted by the CT DEEP will be strictly adhered to. It is our understanding that this type of agricultural activity is permitted as a Use of Right and hope that upon your review you will find the same. Please contact me if there is any other information you may need or if you would like to visit the site together.

Respectfully Submitted,

Austin Harmon
