4. Special Recognitions/Presentations

- a. BJH Advisors, LLC, presentation of CIF Round 5 funded Revive and Renew Routes 163 & 32 final report, findings and recommendations followed by Town Council questions and comments

Mayor Bunnell introduced the representatives from BJH Advisors and Pirie Associates, who have provided several progress reports, hosted town meetings, and submitted a very extensive report regarding the project.

Steve Jacobs, Principal, BJH Advisors, an economic development, public policy, and planning consultant firm, and Laura Pirie, Principal, Pirie Associates, an architecture and planning firm, provided a brief overview of their findings from the Revive & Renew Routes 32/163 Investment Plan. The presentation included the reasoning behind the plan, their findings, the proposed plan, and its implementation.

The primary commercial and civic corridors in Town are Routes 32, which runs through the historic area of Uncasville, and 163. The condition of the corridors affects the Town's economic vitality, housing opportunities, and identity. They are the best opportunity to channel growth into visible and high-impact locations. An extensive market analysis found that the region is experiencing continued employment growth and related housing demand, which the Town benefits from due to its proximity to employment hubs, including Electric Boat and Mohegan Sun, the I-395 corridor, and future growth at Preston Riverwalk. According to the most recent Census data, the 20 to 34 age group is the fastest growing age cohort in Town, while the fastest growing age cohort in the region is age 55 and over. While the Town is positioned to capture a larger share of the regional housing demand, there are very few housing options available for the growing cohort. Additionally, a significant number of residents are traveling outside of Montville to shop. To differentiate itself from the surrounding towns, they propose providing more attainable alternatives to higher-cost nearby communities, especially for young families and first-time buyers, and areas that are more walkable and coherent. Also included in the proposal are amendments to the current zoning regulations for the key locations, which currently limit the necessary tools to support their vision.

Numerous community engagement events were held and a survey was issued, providing ample opportunity for the community to provide their input. The goal is to maintain the Town's character while creating new opportunities for housing for various demographics with very walkable nodes. The public's preference included the creation of a cultural and civic area around a town center with the Town Hall as the central focus, with practical placemaking improvements such as sidewalks, landscaping, lighting, and participatory gathering spaces. The study identified eleven (11) different zones along the Routes 32/163 corridor with geographic or anchor characteristics. The four (4) primary nodes are the Town Center (Route 32/163), the Cove (near Horton's Cove), Palmertown Village (Route 163), and the Paper Mill site near the old Water Tower – each of which would be

connected by a synergistic and supportive relationship. These primary nodes would create the dynamic anchors that become connected over time, setting a pattern for the development of the remaining nodes. The makeup and features of each of the primary nodes were briefly reviewed.

To realize the proposed spaces, a financial analysis of the buildings revealed that gap financing as well as various state programs would be required. Additionally, to capture a larger percentage of the region's projected growth, investments in public improvements that create a "sense of place", making it attractive to developers, would also be required. The improvements would be phased in over time, beginning with the Town Center, which may, in part, be funded by the recently submitted CIF (Community Investment Fund), Round 9, grant application for public infrastructure funding in the nodes presented. The investment plan, which is in the process of being finalized, includes the identification of priority projects, funding opportunities, updating the Town's zoning and design standards, incorporating the plan's priorities within the Town's POCD (Plan of Conservation & Development), and leveraging private funding.

Mayor Bunnell stated that the proposal is a long-term plan that provides a reference point and direction, beginning with the Town Council's recently approved submission of a \$16 million CIF Grant application. He commended the Land Use & Development Department and Planning & Zoning Commission for their efforts.

A Project Manager for Groton Utilities recommended that the Town take advantage of the opportunity to pressure Eversource to install underground utilities as part of the project.

(Mayor Bunnell)

Discussion: Mayor Bunnell explained that the Resolution includes two parts: (1) road widening strips alongside the subdivision on Black Ash and Old Colchester Roads, allowing the Town to utilize the strip for maintenance and the like. Motion made by Councilor Jaskiewicz, seconded by Councilor Baker. Discussion: The following amendment was proposed:

Motion made by Councilor Caron, seconded by Councilor Sabilia, to amend the Ordinance, changing the first violation from a \$1,000.00 (one thousand dollar) fine to either a written warning or a \$125.00 (one hundred twenty-five dollar) fine and no seizure of the vehicle in §370-21(1). Discussion: Councilor Novak felt that the seizure of the vehicle should remain as is, providing the Police Officer(s) with discretion, depending on the situation. Continuation of discussion: Councilor Southard understood the public’s concerns as being related to future Officers who might not be as reasonable and misunderstand the Ordinance, resulting in the seizure of their vehicles. In response, Councilor Jaskiewicz

cited the appeal process. Councilor Sabilia proposed adding a statement to clarify that the vehicle would not be seized on the first offense unless deemed necessary. Mayor Bunnell noted that it was standard procedure to tow a vehicle after an offense; as such, the vehicle is, in effect, automatically seized. Councilor Sabilia expressed his confidence in the current and future police officers' discretion. The Councilors voted on the amended Resolution as follows:
