SEWER WORK NOTICE
Dye Tracing

The test will be performed within 45 days after you receive this notice

The Montville WPCA has initiated a long term plan of sewer system repairs and system upgrades to reduce the amount of rainwater or other clean water that enters the sanitary sewer system. During periods of rainfall and/or high groundwater the Town's Collection System and Waste Water Treatment Facility (WWTF) experiences high flows. It is therefore necessary to locate and repair such sources so that our infrastructure can contain, convey and sufficiently treat the sewage. We are notifying you that testing is required in the vicinity of your home.

URS Corporation has been engaged by the Montville WPCA to conduct a study to locate sources of storm water inflow to the sanitary sewer system. The goal is to repair or remove the sources of inflow, so the sewer system does not overflow during periods of heavy rain. Dye Tracing is one of the methods used to locate inflow.

One of many sources of rainwater entering the sewer system is driveway drains, patio drains and roof leaders. The methodology that will be used in identifying these sources involves conducting field tests. As part of this work we are notifying you that testing is required in the vicinity of your home. You need **NOT** be home during the test.

Over the next several weeks our consultant, **URS Corporation**, and its subcontractor **Flow Assessment Services** will be performing a test, which consist of putting dyed water into roof downspouts and various sources that enter the ground. This activity is no way dangerous or harmful, utilizing a water soluble based dye, and will take approximately 45 minutes. These tests are performed in an effort to locate sources that may contribute rainwater or groundwater to the sanitary sewer system. Analysis of the findings will determine the most cost effective solution for excessive flow elimination.

For more information or for a complete list of buildings that may be tested, contact the Montville WPCA, or visit the Town website at WWW.TOWNOFMONTVILLE-CT.ORG.

Thank you for your cooperation in this effort to provide you with quality sanitary sewer service.

Questions should be directed to Jeffrey Jenkins of URS (800) 247-8811 or Brian Lynch of the WPCA (860) 848-3030 ext 311 between the hours of 8:00 a.m. and 4:00 p.m.
