

Home Improvement Projects.

Please keep in mind that whether it be a pool, a shed, a new deck, a new garage, new heating system, new wiring, etc., you **must** apply for a permit. *Please*, no matter how small a project may seem, contact the Zoning **AND** the Building Officials. In some cases, a permit may be required by one department but not the other. Either official will be glad to get you started and steer you in the right direction for other reviews and/or permits that may be required by other code officials, such as the Fire Marshal for fire safety codes and the Health official for health concerns. Again, it is important to remember that these codes and laws are established mainly to ensure safety--yours, and the homeowners to follow—we want to help you through what can seem trying at times, but is certainly well worth your efforts and ours. Call the Building Official at 848-3030 X382; the Zoning Official at 848-3030 X379.
