Name  Date 6/29/2020

Property Owner if other than Applicant _____ Date _____

Above Ground Pool and Deck Proposal

The proposal is for a 21 foot (or smaller) above ground pool to be installed approximately 15 feet into the 50 foot buffer zone of the manmade run off of the water course. The installed pool would be approximately 35 feet from the man made water course and 60 plus feet from the designated wet lands. The installation of the pool would be conducted by Treat's Pools and Spas.

A small Bobcat may be used to level ground, sand and gravel that may be brought in, in order to install the proposed pool. Any material removed will be used to regrade the area.

I am requesting to install a pool for our family's enjoyment and time together being at home during this quarantine period and the future. Our backyard circumstances are such that I am unable to use much of it due to our septic taking up 1/3 of the backyard and much of the other 2/3's of it is wetlands, watercourse and uplands. We have looked into many different ways to avoid using the uplands but unfortunately our backyard configuration doesn't allow us to do so.

Installation of this proposed project would start approximately 30 days after permit approval and should be completed in ten days. Thank you for your time.
